

## Bibliotheca flexAMH™ Change Order Approval Form

Change Requested by: Palatine Public Library  
Change Approved by: Craig Chandler

A change was requested from Palatine Public Library for the proposed flexAMH™ sortation system from Bibliotheca. This change was requested after the final signing of the quote. The price of the flexAMH sorting system quote was \$338,946.00 and was approved on September 30<sup>th</sup>, 2025.

During the Customer Kick-off call, a change was made to the layout of the room, and thus altering the position, size, and length of the flexAMH sorter. In its current state, the system would not fit into the space provided without causing issues. The necessary changes that were made were the relocation of the lift gate to access the back side of the sortation system, as well as the addition of another belt, taking the total belt count from 4 to 5 on the initial induction.

The changes requested will increase the price of the flexAMH System by \$12,215.00. The new total price will be \$351,161.00.

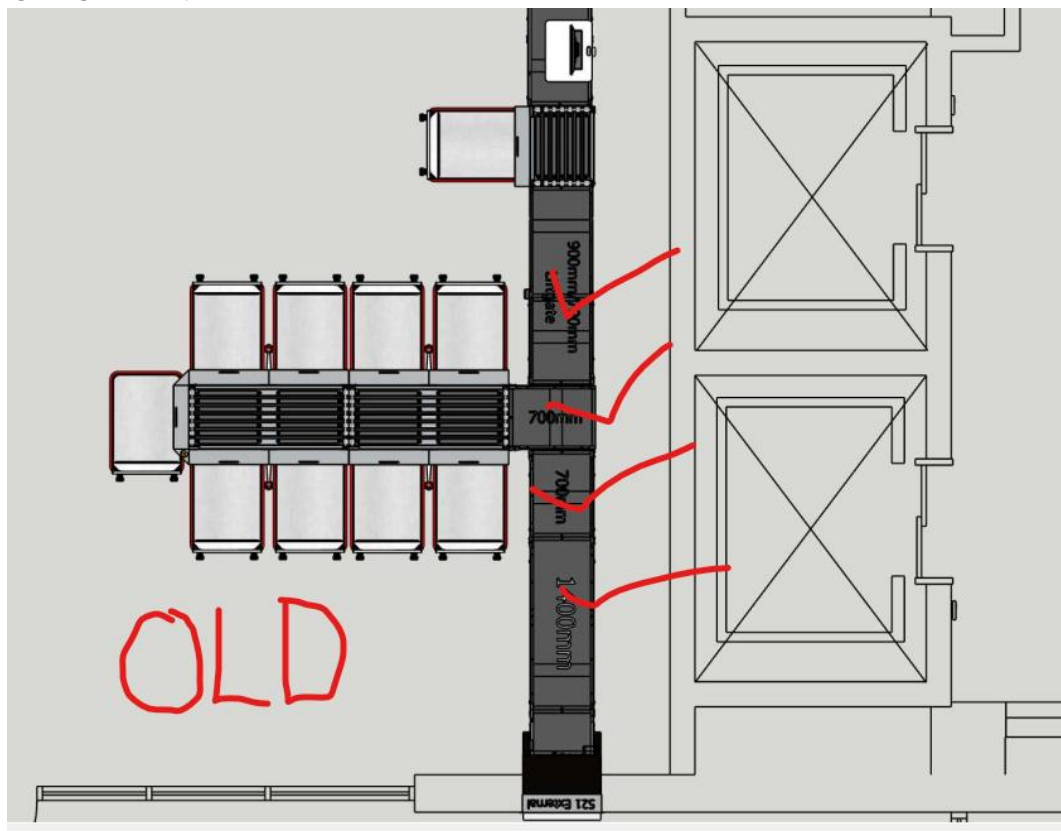

These initial changes to the flexAMH System not be increase the price on the pre-paid support or the shipping costs.

Signing below confirms the understanding of the alterations of the flexAMH system as well as the acceptance of the increased cost to the final total.
