• What is it?

This machine allows you to create personalized items by printing your design using a special ink that adheres to polymer or polymer coated materials, typically polyester.

• What can it make?

Since this machine is so versatile, it can help create a wide variety of items including:

- Mugs and Tumblers
- Clothing and Fabrics made of at least 60% polyester
- Coasters, Tags, and Keychains
- Special treated glass and metal

As long as it's specifically a sublimation blank, it can be used. We try to keep various stock available including:

- 20oz tumbler – \$4.00 each
- 15oz mug – \$3.00 each
- Ornament – \$2.00 each
- Coaster - \$1.50 each
- 8.5 x 11 Print – \$1.00 each (When bringing your own blank)

We encourage you bring in your own material for use on the machine at no cost, but they must be approved before use.

● What do I need?

You should either create or buy your design that you'd like to press into your material or book an appointment to learn how to get started on the design you have in mind. If you'd like to use personal photos, make sure they are a high quality (most photos taken on phones are okay).

We do have the Cricut Mug press available, which is compatible with infusible ink transfer sheets and infusible ink markers.

● Additional Info

- The Sawgrass does not support edge to edge printing, so be sure to factor that into your design size
- Mirror designs before printing them
- Make sure to wipe off the surface of your blanks and wrap them tightly before pressing
- Materials will be **VERY HOT** so please handle with our silicone gloves and let cool before removing tape
- Sublimated Mugs and Tumblers can go in the dishwasher, but be cautious of high temperatures
- Be mindful of the brightness and contrast in personal photos so that your chosen design doesn't come out too dark.
